Final animation project

Your challenge is to make an animation using the principles we have learned.
How you animate is up to you:
- Pivot stick figure-5 minutes
- Flash- 3 minutes
- Stop motion- 2 minutes
- Claymation- 1 minute
- Hand drawn- 30 seconds

Sequence:
  i. Brainstorm ideas (create characters, plot, backdrop, etc…)
 ii. Create a script
iii. Storyboard your script (use at least 5 different shorts per 30 seconds to help illustrate your story)
 iv. Submit your storyboard to Mr. Bezeau and discuss the project with him
  v. Start animating (remember to use the 12 principles of animation)
 vi. The finished product must have appropriate sounds (include the sounds you will be using in your storyboard.

*Unless you are using computer based animation you will need a program to piece all of your pictures together to make a video. (Ex. Movie maker, lightworks, imovie, shortcut, davinci resolve, Hitfilm 4 Express etc…) and a program to put sounds on it (mixcraft, garageband, etc…).

Criteria:
- You must have 10 frames per second.
- Groups of no more than 2
- The animation must have a 5 second creative title page
    - Title of the animation
    - Names of the animators
    - Type of animation

Some Ideas:

- **"MINING ROCKS! VIDEO CONTEST"**

- Music video
- Safety video
- A day in the life
